

# CHIROPRACTIC TESTIMONIAL

Tell your story about how Chiropractic helped you regain, obtain and enjoy life and health more abundantly! Remember, your story may help others achieve the level of health that all of us deserve.

The following list might help you with your story: What health problems you've had, for how long, have they interfered in your life or activities, have you seen any other doctors (M.D.s, Osteopaths, Acupuncturists, etc.) what treatments/drugs were prescribed, the results/ side effects, when did you start chiropractic care in our office, who referred you, describe your results, are your family/friends under care. Add anything else about our office, staff, techniques, policies, etc. that you feel may help others in their journey to better health.

When I came in for my first visit to Dr. Fiore, I had been in serious pain for a long time. I had been under the care of a surgeon who had prescribed intense back surgery to fuse the lower vertebrae in my spine. It would have involved 6 months of recovery and removal of bone from hip. I was terrified of going through that serious an operation and not be guaranteed relief from pain.

I tried all sorts of other treatment - physical therapy, cortisone injections, acupuncture and treatment from a different chiropractor who told me I would need at least 50 treatments.

I was introduced to Dr. Fiore by a Holistic Fitness coach - Wayne Daniels. This introduction turned my life around! It was like a miracle happened for me. I thought I might never be relieved of my pain. After only two visits and adjustments I could walk upright - I could get out of bed!

(See other side)

I can never repay Dr. Fiore for what he has done for me.

He is the most caring, loving Dr's I have ever known. My visits to see him are fun - his great sense of humor and gentleness add so much to the great skill he has as a Chiropractor.

I will recommend him and DO - to anyone who suffers from pain. He is my miracle worker!

**THANK YOU FOR HELPING US HELP OTHERS!**

I hereby testify that the above statements are true, to the best of my knowledge, and release this information to be used for the purposes of patient education.
