

Chiropractic Testimonial

My name is Marilyn, I am 88 years old.

I was introduced to Dr James Fiore, about April of 2011, by my son who was a patient, of Dr Fiore. He was very pleased with his treatments using the upper cervical Blair method.

I am thankful that I came to Dr Fiore as the treatment, using the Blair method, was very successful.

After I had the painless adjustment to my cervical atlas, I no longer have any sciatic pain in my hip. In fact I no longer have any pain in my entire body.

I'm sure it is because of the expert Blair method of chiropractic Dr. Fiore gave me.

I have recommended the Blair cervical method to my sisters, who have since had success with the Blair method of cervical chiropractic treatments. They are also in the eighties, and have had problems that responded to chiropractic adjustment.

One sister had a severe turning out of her right foot that caused her to have balance problems. The foot has turned back and she no longer has need of a cane.

My other sister had severe neck problems, where she had to turn her whole body to look back. Now she has full movement restored to her neck movement and her sciatic hip pain has disappeared.

This is to let you know a person can be helped, at any age, by Chiropractic Blair method treatments.

I hereby testify that the above statements are true, to the best of my knowledge and release this information to be used for the purposes of patient education
