"LIVE LONG AND PROSPER"

Hi. Just wanted to let you know what is occurring on the political scene in America "Land of the free...". Our senators from CA, Boxer and Feinstein, are in the process of trying to push thru a bill that would remove the freedom of all of us to raise our children as we see fit. The bill will eliminate the "opt out" clause for religious or philosophical objections from the school vaccine program. This would make us have to vaccinate our children, even if we do not wish to do so.

As you know, I do not vaccinate my children and advise all of my clients to do their "due diligence" before choosing to vaccinate – just educate yourself about vaccines and their effect before letting your children be used as guinea pigs for the pharmaceutical companies. Fact is, none of the vaccines have been thoroughly tested and there are a myriad of questions about their link to autism, birth defects, mercury contamination, links to disease in later years – the list of possible harmful side effects are numerous.

Using the current media scare tactics about the measles outbreak to further a political agenda is a travesty. Taking away our basic rights as American citizens is an even greater affront to our democratic way of life. At the present time, since the year 2000, there have been 4 cases of death from measles and 180 deaths from the vaccine itself....how about those stats. And these representatives of our great state are using this media hype to scare us into thinking that vaccines are necessary in order to further their political campaign. (I wonder how much money comes to them from the big pharma lobby). If children are vaccinated, why should they worry about catching a disease from an unvaccinated child???

Please write or fax a letter to these two misinformed women about the fact that you oppose their bill and ask them to stop taking away our basic rights as American citizens and stand up for the ideals that this country represents – life, liberty and the pursuit of happiness. It is about time we had some representatives who stood for the things that matter, not for programs backed by powerful lobbies for the pursuit of financial gain at the expense of the poor and middle class.

Our veterans died to preserve these freedoms. Let us not defame their sacrifice by sitting idly by while the freedoms they fought and died for are eroded by those who have no respect for our inalienable rights.

This is not about vaccination, it is about preserving our freedoms, which are being taken away little by little. It is time to say enough is enough, let your voice be heard. After all, this is still America.....

"Nuff said..."
