CHIROPRACTIC LIFE

THE NEWSLETTER ABOUT HEALTH,
WELLNESS, FUNCTION AND LONGEVITY.

"LIVE LONG AND PROSPER"

Spring has sprung! I love the fact that I can grow my veggies – we have planted carrots, corn, beets, lots of peppers and tomatoes, watermelon, cukes and sunflowers and they are all growing. My daughter, Teyeah, loves to work with her daddy in the garden. She's the one with the green thumb.

As you probably have heard by now, we have lowered our prices in an effort to make it more affordable for you to come in at regular intervals (at least once a month). Yes, it really is that important!!

We have scheduled our first soiree for the last Thursday of this month (May 29th). We sent out about 20 invitations, but so far only one response – bummer. I thought the fact that I was cooking an Italian sauce would be an attraction. NOT! If you would like to attend please let us know either by phone or e-mail jamec1dc@gmail.com by May 23rd. We request that you bring someone whom you think would benefit from UC care. If they attend, they get a free consult. Our guest speaker is Ron Andrews. He will be talking about the benefits of cold laser therapy in conjunction with UC care for musculoskeletal conditions. Starts at 6:30 and should go till about 8:30. We hope more of you will respond, looking forward to a fun night. We really would like to get this program off to a good start as we are planning to have a get-together about every other month - dinner and a guest speaker. It is a great opportunity to help spread the word about UC care. So many people you know are suffering needlessly because they don't have the information you have. You can help them and us by introducing others to the "Big Idea". Thank you in advance for your participation and assistance.

A special "thank you" to all those who have referred their friends and neighbors recently, especially Linda Mussallem, Chris Parker, Ron Andrews, Brad & Darlene Graham, Christine Michael (she referred her whole family!), Jeff Brion & Rosanne Ramirez (The Float lounge folks), Linda McGunigale, Trent Douglas, Angela Sinnett, Debbie Meeker, Ron Czaplicki, Bryce Patterson and Daniel & Michelle Neiman.

Some very interesting news from the Health Freedom Alliance. Recent research has shown that unvaccinated children will probably be the next generation of healthy adults. According to historical charts, graphs and two centuries of official statistics, we know that vaccines have never prevented any disease and are in no way responsible for improving life expectancy and survival from disease in western economies. In North America, Europe and the South Pacific, major declines in life threatening infectious diseases occurred historically either without or far in advance of public vaccination efforts for specific disease. In a just published shocking study virology researchers at the Erasmus Medical Center in the Netherlands (these are pro-vaccine researchers who have spent their careers trying to develop better vaccines) reported that the flu vaccines "have potential drawbacks that have previously been under appreciated and that are also a matter of debate". Their findings revealed that unvaccinated children have a superior immune system response, giving them broader protection against what they might face in an actual flu season, including pandemic strains. Also, unvaccinated children are far less affected by common diseases. <http://healthfreedom.org/2014/04/22/unvaccinated-children-will-be...>

If you need any info about our anti-inflammatory/weight loss diet please refer to our February newsletter. If you need a copy, please ask Suanne for one when you come in. Hope to see you soon. Live long and prosper.....
