

CHIROPRACTIC TESTIMONIAL

I have suffered from headaches for over 40 years. They started in my early 20's and had become progressively worse until they were almost daily.

The headaches would come every 1 ½ hours and last approximately fifteen minutes, but they were continuous 24 hours a day, seven days a week, and when the headache cycle started they would last for months.

I have seen many doctors over the years, all of who were unable to identify the cause of the headaches, but prescribed a variety of medications. When the medications were changed the intensity of the headaches would be reduced, but only temporarily. The intensity of the headaches would increase again and I was in the same situation.

I was constantly taking pain pills in addition to the medication prescribed by the doctors, all with little or no effect on my headaches, except for the pain pills, which dulled the pain. It had reached the point where the medications I was taking were beginning to affect my kidneys.

Finally a friend recommended the "Blair Method" of chiropractic care and Dr. Fiore in particular. My friend had done a great deal of research for his mother who was also in need of a Chiropractor.

I was somewhat skeptical because over the years, none of my medical physicians had ever recommended a chiropractor or even discussed the possibility that seeing one might improve my situation.

I eventually came to see Dr. Fiore and after a few short months my situation improved greatly and my headaches virtually disappeared.

I realize that I will continue to suffer from headaches for the remainder of my life, but they are much less frequent and much less intense.

When I do experience headaches a visit to Dr. Fiore's office will usually put a stop to them. I have stopped taking all medication and life is good again.

THANK YOU FOR HELPING US HELP OTHERS!

I hereby testify that the above statements are true, to the best of my knowledge, and release this information to be used for the purposes of patient education.
