

⌘ CHIROPRACTIC TESTIMONIAL ⌘

Tell your story about how Chiropractic helped you regain, obtain and enjoy life and health more abundantly! Remember, your story may help others achieve the level of health that all of us deserve.

The following list might help you with your story: What health problems you've had, for how long, have they interfered in your life or activities, have you seen any other doctors (M.D.s, Osteopaths, Acupuncturists, etc.) what treatments / drugs were prescribed, the results / side effects, when did you start chiropractic care in our office, who referred you, describe your results, are your family / friends under care. Add anything else about our office, staff, techniques, policies, etc. that you feel may help others in their journey to better health.

Words are inadequate to express how grateful I am to have Dr. Fiore in my life. I was completely abandoned by the medical community, at a time when I thought I needed them most. After being bounced from my Internist to an orthopedist to a vascular surgeon back to an orthopedic surgeon, an MRI revealed a pinched nerve root and a congenital bone defect in my back. I was given the option of a pain blocker shot or surgery, with no explanation. A co worker introduced me to Dr. Fiore, who showed more compassion, understanding and a sincere feeling of hope in a 10 minute phone call than any of the previous doctors. He saw me the day I called him and explained his work and how he could help me. The pain I had been in was affecting every aspect of my life and the people around me. From the first session with Dr. Fiore the pain began to subside and my life was changed for the better. Within just a few short months I was stable enough to be introduced to associates of Dr. Fiore's who, with him, have improved my condition and my quality of life now and as I get older. Dr. Fiore will be in my heart forever.
