A PERSONAL TESTIMONIAL
(regarding Dr. Fiore)

2/16//10

To Whom It May Concern:

On November 23, 2009, I had my first appointment with Dr. Fiore. Previously, for more than 8 years, I had experienced steady pain in the areas of my left shoulder and left scapula, and had been unable to sit up erect, having been relegated to a "kick back" chair. I took it everywhere, ie., to church, to restaurants, etc.

Dr. Fiore spent over an hour and one-quarter that day X-raying me, taking various measurements, and the like. As I understand it, after this careful examination, he determined that I was out of line at the top of my vertebrae. He then adjusted my neck. It was quick and there was no discomfort.

Very shortly thereafter, the pain disappeared. I presume this was because his adjustment had removed bone impingement on a central nerve, which had caused pain to be referred from the neck area to the left shoulder and scapula. I am presently pursuing a program designed to strengthen me sufficiently so that I will over a period of time not be required to use my "kick back" chair. I am most optimistic concerning the success of this.

I would enthusiastically refer anyone to Dr. Fiore. He was meticulous in his handling of me and most successful. I have since seen him on a number of occasions, and each time, thank God, his testing has confirmed that the adjustment has held.

I would be happy to share further with anyone this most positive experience. Just give me a call.

Cordially,

Frederick W. Hearn
